PROFILE

Builder-designer with 20 years of experience. I started as a developer at Opera, moved into design, and now take problems from customer to shipped feature myself, prototyping and building with AI in React, TypeScript and Supabase with Claude. I built Bachata Connect, a multi-role platform, solo in five months, and measure design on what shipped: I removed a feature after testing it and changed a wristband's job when only 38% of holders used it. Before that I took Pepper, Israel's first digital bank, from zero, and led TSB's app from 1.8 to 4.6 stars. Executive MBA (Warwick). Native Spanish speaker.

KEY STRENGTHS

- **Design and ship in code with AI:** designed and built Bachata Connect end to end with Claude and AI coding agents: strict TypeScript, CI that blocks failing typechecks, a Playwright harness; Claude runs in production.
- **Design systems kept in sync with code:** one app with different views for participants, reviewers, door staff, teachers and admins; three brands from one component library; 86 colour pairs contrast-tested on every pull request.
- **Experiments that change the product:** tested and removed a noticeboard; recommended classes sold at twice the rate and 65% bought add-ons; NFC wristband check-in replaced a 20-minute manual registration (344 arrivals).
- **Zero to one and fast shipping:** Pepper, Israel's first digital bank, from zero (onboarding conversion 30% to 85%); TSB's app and design system from 1.8 to 4.6 stars with no product managers.

EXPERIENCE

Head of Customer Experience | Vanquis Bank — Apr 2023 – Apr 2026

- Owned customer-experience strategy across consumer-finance products serving 1.7M+ customers.
- Led early-intervention strategy for credit cards and vehicle finance; redesigned journeys for 109,500+ customers.

Head of Design, Customer Experience & Innovation | TSB Bank — 2018 – 2023

- Took the mobile app from 1.8 to 4.6 App Store stars and led the design and delivery of the new app with the IBM engineering team.
- Built the in-house design function from zero (up to 17 people). With no product managers, my team led the roadmap.

Lead Product Designer | SapientRazorfish (client: Amplifon, Italy) — 2017 – 2018

- Ran research with users and audiologists across Italy; reframed a control app into a behaviour-change companion.
- 6,500+ downloads in four months; six international awards including The Drum DADI and EPICA.

Co-founder & Director | Neon Lighthouse Ltd — 2023 – Present

AI product studio. Advised a soil-sensing robotics company on farmer UI and user-testing protocols.

- Build AI-native products from discovery to production with Claude, Next.js, Supabase and Vercel.
- Building Breathing Room, a conversational AI financial-wellbeing coach grounded in my MBA research on financial avoidance.

Founder & Product Lead | Bachata Week / Bachata Connect — 2014 – Present

International dance training week. I designed and built its platform end to end.

- Built a multi-role platform (participants, reviewers, staff, teachers) solo in five months: strict TypeScript, CI that blocks failing typechecks, Playwright harness.
- Integrated Claude in production to translate expert feedback and generate digests for artists.
- Replaced a 20-minute manual registration with NFC wristband check-in: 344 arrivals over two afternoons.
- Built a rule-based recommendation engine; recommended classes sold at twice the rate of others, and 65% bought add-ons.

Lead Product & Service Designer | Designit — 2013 – 2017

- Redesigned breast cancer diagnosis at Oslo University Hospital: 12 weeks to 6 days, now Norway's national standard.
- Led design and the roadmap for Pepper, Israel's first digital bank, from zero: journeys and onboarding, with conversion from 30% to 85%.

Interaction Designer | Opera Software — 2002 – 2013

- Browsers for mobile, TV and gaming devices, including the Nintendo DSi and Wii; worked in Oslo, Tokyo and Beijing.

EDUCATION, TOOLS & LANGUAGES

Executive MBA, Warwick Business School · 2023 – 2026 · Certificate in Strategy, Harvard Business School · 2023 · BSc Informatics (computer engineering), University of Oslo · 1999 – 2004

Tools: React, Next.js, TypeScript, Supabase, Vercel, GitHub Actions, Playwright, Claude and AI coding agents, Figma

Languages: Spanish (native), Italian, English and Norwegian (fluent)
